

## Leap4Freedom

Jump into a new future

Okay, so let me start off by telling you that my first month wasn't easy and the reason being is because I was rushing to start generating some money while I was learning through the program rather than focusing on putting the right foundation into my business. My bad...

To tell you the truth I never being the type of computer guy that enjoys spending all day and night in front of his laptop so for me the beginning was more about learning the basic of Word Press, AWeber and the SFM platform and all of the functionalities. This is something that came very easy these are all very logical systems to use.

- So I think my personal challenge was first of all dealing with my zero computer skills and having to learn a little bit every single day;
- The second challenge was to accept that it takes time before you start earning. You see this is not something that will happen overnight, whether you want or not it is going to take time for your website to start generating organic traffic and more importantly for you to learn which marketing campaign works and which doesn't.
- The third challenge was to stop listening to people around me who kept telling me not to invest my time into this. Unfortunately, there are people that get it and people that don't and are happy to keep winging about their lives without taking any action in order to make the changes that they need. I certainly couldn't change their mind and convince them of other ways of living. So I simply worked on my mindset and decided to do whatever it takes to get there.
